

Module 1 Quiz

Quiz, 10 questions

10/10 points (100.00%)

Congratulations! You passed!

[Next Item](#)1 / 1
point

1.

Which of the following are key concepts found in all object-oriented programming languages, according to the lessons in this module?

Lambda expressions

**Un-selected is correct**

Concurrency

**Un-selected is correct**

Abstraction

**Correct**

Transactional memory

**Un-selected is correct**

Polymorphism

**Correct**

Inheritance

**Correct**

Module 1 Quiz

Quiz, 10 questions

10/10 points (100.00%)

2.

Which of the following are examples of data abstraction features supported by Java, according to the lessons in this module?

☐

for loops

**Un-selected is correct**☐

Interfaces

**Correct**☐

Classes

**Correct**☐

if statements

**Un-selected is correct**1 / 1
point

3.

Which of the following is the best definition of an "abstract data type" (ADT), according to the lessons in this module?

☐

An ADT selectively alters the flow of control through an app so it performs different computations based on programmer-specified conditions.

☐

An ADT defines an anonymous method that can be passed as an argument or returned as the value of method calls.

☒

An ADT defines a set of data values and a set of operations on these values.

**Correct**☐

An ADT separates the control flow paths of normal app execution from the control flow paths of anomalous app execution.

Module 1 Quiz

Quiz, 10 questions

10/10 points (100.00%)

4.

Which of the following are accurate descriptions of differences between Java classes and interfaces, according to the lessons in this module?

☐

A Java interface provides a subset of the features provided by a Java class.

Correct

☐

A Java class is a data abstraction mechanism, whereas a Java interface is a control abstraction mechanism

Un-selected is correct

☐

A Java interface cannot be instantiated directly, whereas a class can.

Correct

☐

A Java class can be part of a package, where as a Java interface can't.

Un-selected is correct

1 / 1
point

5.

Which of the following are benefits of Java generics, according to the lessons in this module?

☐

They ensure compile-type safety when operating on different types.

Correct

☐

They help eliminate unnecessary duplication of code.

Correct

☐

It separates the control flow paths of normal app execution from the control flow paths of anomalous app execution.

Un-selected is correct

Module 1 Quiz

Quiz, 10 questions They automatically reclaim and recycle objects that are not currently in use by an app.

10/10 points (100.00%)

Un-selected is correct

1 / 1
point

6.

Which of the following are benefits of inheritance in Java, according to the lessons in this module?

- ☐ It determines the order in which individual statements or method calls are evaluated or run.
- ☐ It provides a namespace for organizing Java code in a logical manner.
- ☒ It enhances reuse by allowing classes to reuse common state and behavior from other class.

Correct

- ☐ It hides a class's internal representation to ensure apps using the class can only access its public operations.

1 / 1
point

7.

Which of the following describe the purpose of exception handling in Java, according to the lessons in this module?

- ☒ It separates the control flow paths of normal app execution from the control flow paths of anomalous app execution.

Correct

- ☐ It simplifies the management of large software projects by avoiding collisions between classes that have the same common name.

Un-selected is correct

- ☐ It enables the repetition of a block containing one or more statements within an app.

Un-selected is correct

Module 1 Quiz

Quiz, 10 questions

It makes Java apps more robust and easier to understand and evolve.

10/10 points (100.00%)

Correct

1 / 1
point

8.

Which of the following describe the purpose of polymorphism in Java, according to the lessons in this module?

- ☐ It enables the passing of types as parameters to the definition of classes, interfaces, and methods.
- ☐ It defines an anonymous method that can be passed as an argument or returned as the value of method calls.
- ☐ It separates the control flow paths of normal app execution from the control flow paths of anomalous app execution.
- ☒ It enables transparent customization of methods in a subclass that are inherited from a super class.

Correct

1 / 1
point

9.

Which of the following are expectations of learners who take this MOOC, according to the lessons in this module?

- ☒ You are expected have basic computer literacy skills, such as knowing how to send & receive emails and browse the web.

Correct

- ☐ You are expected to know how to program Java for Android apps.

Un-selected is correct

- ☐ You are expected to be interested in both the concepts and practice of developing mobile apps

Module 1 Quiz

Quiz, 10 questions

10/10 points (100.00%)

You are expected you to have a Computer Science degree.

Un-selected is correct

1 / 1
point

10.

Which of the following are recommended strategies for learning the material covered in this MOOC, according to the lessons in this module?

Follow the links to articles, tutorials, source code, and documentation provided in the lesson slides.

Correct

Participate in the online discussion forums.

Correct

Attend Coursera meet up groups near you.

Correct

Watch the lessons carefully before taking the quizzes and doing the programming assignments.

Correct
